

Make a difference with JBP

Join our team to help increase community
resilience to natural disasters

Innovate everyday with JBP

Opportunities for Flood Risk Specialists,
Hydrologists, Coastal Engineers and Disaster
Managers in Brisbane, Australia.

Your important part with us

We have a range of opportunities for **technical directors**, **seniors**, **mid-level** and **juniors**.

Technical director or senior positions:

For those wanting to build their **own team**, work with autonomy, and chase the projects they are **passionate** about. This role would involve developing a new **technical** team in Brisbane, targeting your own field of expertise plus supporting our wider Asia-Pacific work.

You will need:

Technical and business **development** experience, excellent **communication** skills, and over **10 years'** experience in flood, hydrology, coastal or forecasting system development.

Mid-level positions

For those wanting to apply their skills on the worlds water-related problems. We want to see those passionate about their work, who want to innovate and work differently.

Junior positions

For any graduate or early-career people aspiring to work in the flood, coastal or disaster management sector.

Making a difference at home...

Floods, cyclones, typhoons, storm tides, coastal erosion - no matter the weather phenomenon we want to study it, understand it, plan for it and propose ways to minimise impacts. Here our modellers, engineers and forecasters work together to develop integrated weather resilience strategies.

Whilst there are many challenges ahead, by driving our initiatives forward we can help a wide range of people living throughout South-East Asia, the Indo-Pacific and here in Australia.

...and away

Over the past five years we have expanded throughout the Asia-Pacific region and are now working for national governments and international bodies such as the **World Bank**, **Asian Development Bank** and the **Mekong River Commission**.
